

# THE SHRINK

## THE MEMBER BRIEFING

An AI analysis engine of 12 specialized agents that fight out every chart in silence. Only on consensus does a card drop: a TRADE card with exact entry, SL and targets — or a deliberate NO TRADE. This document is the complete system, in writing.

# No consensus, no call.

Every agent reads the chart from one angle — structure, liquidity, timing, macro, order flow, psychology. They debate in silence. If they don't agree, there is no setup. Period.

## TRADE CARD

Consensus reached. One card with exact entry, SL, TP1, TP2, size and expiry.

## NO TRADE

No consensus. That's an outcome too — with the exact level to watch and the trigger that would still produce a card. Not trading is a position.

*“Confidence = honest confluence count. Minimum 65% to trade. Capped at 90%. Never inflated.”*

# How a card is made.

Five steps. One outcome.

## 01 Chart In

One chart, one timeframe set: 15M + 5M, cross-ref 1H + 4H.

---

## 02 12 Agents Read

Every desk analyses independently. No one sees each other's work.

---

## 03 Silent Debate

Votes are weighed. Vetoes count hard.

---

## 04 Consensus Gate

Below 65%? Automatic NO TRADE.

---

## 05 One Card

TRADE or NO TRADE. Nothing in between.

---

# The floor.

Twelve desks. Each reads the chart from exactly one angle. Eight vote in the consensus, three weigh context and conviction, one guards the discipline.

## CORE — 8 VOTES

### RALLY

Bull Desk

*"Momentum is your friend."*

### VECTOR

Direction Desk

*"Trend is direction. Direction is edge."*

### HUNT

Liquidity Desk

*"Follow the liquidity."*

### MACRO

Psychology Desk

*“The data is not concerned with how you feel about it.”*

#### THE TWELFTH SEAT

Shrink doesn't trade — he watches. Every trade is logged, every pattern registered: revenge trades, overtrading, oversized risk after a loss. Zero sympathy, only data. Including your distance to prop-firm limits: FTMO · Topstep · The5ers · FundedNext.

# Anatomy of a card.

## XAUUSD 15M — LONG

78%

**ENTRY** 2318.50 (Bull OB retest)

**SL** 2311.00 (Invalidates OB)

**TP1** 2334.00 → R:R 1:2.1

**TP2** 2348.00 → R:R 1:3.8

At TP1: close 50%, move SL to break-even.

SIZE 1.5% | VALID 16:45 Dubai | STRATEGY C | KILLZONE STRONG

CONSENSUS 6/8 BULL

FLAGS: OB+FVG STACK · CORREL OK · OVERLAP CONT

*Example card · prices illustrative*

### Header line

Asset · timeframe · direction · killzone status · confidence.

### Entry

Exact price, plus what the level is.

### SL

Stop placement, plus what breaks if hit.

### TP1 / TP2

Targets with R:R; at TP1 close 50%, SL to break-even.

### Size / Valid

Risk as % of account · expiry time.

### Strategy / Killzone

Which of the three strategies, and window quality.

### Consensus

How many of the 8 core agents agreed.

### Flags

Max 3. Every flag is a meaningful condition, not decoration.

# Confidence & sizing.

| 85–90%<br>NY continuation, first 10 trades: ×0.5 all above. | 2.5% risk |

# Trading DNA.

## **XAUUSD — STRONGEST (88%)**

ADR 150–300p. London 09:30–11:00 = HUNT only (sweep risk high). Best window: NY 15:30–17:00. Inverse DXY always applies.

## **EURUSD — CLEANEST (75%)**

Small ADR. Prime: 09:30–11:00 + 13:00–13:30 Silver Bullet. Closed after 14:00. No NY trades.

## **GBPUSD — WEAKEST (50%)**

Prime window: 09:30–10:00 ONLY. Closed after 13:00. Requires 5+ confluences minimum. Handle with care.

## **NAS100 / US30 — INDICES**

Small sample. Prime: 15:30–17:00. NAS100 inverse VIX. US30 = 1H OBs most reliable. Avoid Fed/CPI windows.

**CRYPTO = OUT OF SCOPE — no card issued. Response: OUT OF DNA.**

# Session timing.

| DUBAI TIME  | SESSION   | ASSETS                            | NOTES                            |
|-------------|-----------|-----------------------------------|----------------------------------|
| 08:55–09:30 | PRIME     | GER40                             | DAX open. All others dead.       |
| 09:00–09:30 | JUDAS     | GBP/EUR pairs                     | NO ENTRIES GBPUSD/EURUSD/GBPJPY. |
| 09:30–10:00 | PRIME     | GBPUSD, GBPJPY, XAUUSD            | London Sweep. XAU: HUNT only.    |
| 10:00–11:00 | PRIME     | EURUSD                            | Others active but secondary.     |
| 11:00–13:00 | ACTIVE    | EURUSD, GBPUSD                    | Momentum fades. Reduce size.     |
| 13:00–13:30 | PRIME     | EURUSD (Silver Bullet)            | Strategy B window. 30min only.   |
| 13:30–15:00 | DEAD      | —                                 | Lunch dead. No prime setups.     |
| 15:00–15:30 | INCOMING  | XAU, USDJPY, NAS100, US30         | NY pre-open. Watch only.         |
| 15:30–17:00 | PRIME     | XAU, USDJPY, NAS100, US30, GBPJPY | Best overall window.             |
| 17:00–18:30 | PRIME     | XAUUSD, USDJPY                    | NAS/US30 active. 1st 10 = 50%.   |
| 18:30–20:00 | REDUCED   | XAUUSD only                       | 50% size. Others dead.           |
| 20:00+      | DEAD ZONE | —                                 | NO ENTRIES. Hard gate.           |

# The three strategies.

## STRATEGY A · 09:30–11:00

### London Sweep + OB Retest

Sweep of prior high/low → rejection → return to OB. Needs clean displacement + confirmed sweep. XAU sweep must be 70%+ clean.

---

## STRATEGY B · 13:00–14:00

### Silver Bullet FVG

15M FVG from last 3 candles. Must be HTF aligned. 30-min window only. EURUSD primary. Expires fast — watch valid-until time.

---

## STRATEGY C · 15:00–18:30

### Overlap + NY Continuation

Trend pullback to OB/FVG. HTF aligned. NY cont (17:00–18:30): XAU, USDJPY, NAS100, US30 only. 50% size first 10 trades.

---

# Hard rules.

No exceptions.

**R01** NO ENTRIES during Judas window 09:00–09:30 on GBPUSD, EURUSD, GBPJPY. Fakeout probability too high.

---

**R02** DEAD ZONE after 20:00 Dubai. Zero entries. System hard-stops. Asia session = no edge.

---

**R03** NO TRADE if high-impact news within 60 minutes of entry. Prop firm: override permanently blocked.

---

**R04** R:R minimum 1.5. Below that = automatic veto by HEDGE. Card will not be issued.

---

**R05** No entry mid-range. Requires a clean POI (OB or FVG). Mid-range entries are the fastest way to blow stops.

---

**R06** After 2 consecutive losses → size drops 50% automatically. Flag: REDUCED SIZING.

---

**R07** Drawdown 3–5% → max 0.5% risk per trade. Drawdown >5% → NO TRADE until reset issued.

---

**R08** CRYPTO = OUT OF SCOPE. No card issued. Response: OUT OF DNA.

---

**R09** Every card expires. Strategy A: +45min. Strategy B: +30min. NY prime: +90min. NY cont: +60min.

---

**R10** AT TP1 — always close 50% of position and move SL to break-even. Non-negotiable.

---
